- ✓ Video endpoints: Cisco and Polycom (Dial out:) all systems
- ✓ Scheduling: Outlook, Google Calendar
- ✓ Conference Services: Pexip, Cisco CMS, Skype4B and most cloud video services

Everybody meets. We make meeting easy

Hassle free creation and joining of video meetings

Synergy SKY Meeting Server, SMS, is a product agnostic hub for intuitive and user-friendly scheduling and starting of all your video meetings. SMS allows anyone to create video meetings in Outlook or Google Calendar without plug-ins. Join meetings with ‘one-click’ from video systems, mobile or browsers.

SMS ensures that everyone can schedule video meetings just like any other meeting and start it on-time. Broad vendor support makes SMS ideal for organizations with mixed environments, internal and external communications as well as homogeneous organizations who are communicating with externals with unknown video solutions.

Start all video meetings **on-time** with one-click from Cisco and Polycom rooms

Ease of use both in scheduling and participation of video-meetings will drive adoption and usage

No plug-in and no change in behavior for the user in booking meetings. Its native in Outlook / Google Calendar

Free **SMS** trial
